                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Autopology 143:297-302(1997).

-i- CATALYTIC ACTIVITY: N-acetyl-L-glutamate 5-semialdehyde + NADP(+)

-i- Phosphate = N-acetyl-5-glutamyl phosphate + NADPH.

-i- CATALYTIC ACTIVITY: ATP + N-acetyl-L-glutamate = ADP + N-acetyl-L-

-i- PATHWAY: SECOND AND THIRD STEPS IN ARGININE BIOSYNTHESIS.

-i- PATHWAY: SECOND AMICOPATION: MICOCHORAIAI.

-i- SUBCELLULAR LOCATION: MICOCHORAIAI.
